

# DDoS Protection & Web Acceleration

# DDoS Protection and Web Acceleration from Plan B – accelerate and protect your business

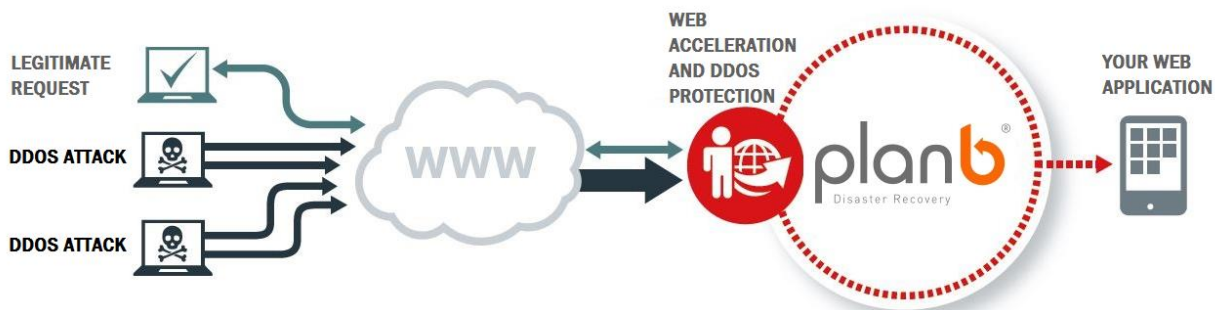

DDoS Protection and Web Acceleration is a service for businesses that would like to get the most out of their website. Benefit from enhanced performance, security and availability of an application through the use of a number of European wide delivery nodes and state-of-the-art, intelligent DDoS mitigation.

## WHY CHOOSE PLAN B FOR DDOS

### PROTECTION AND WEB ACCELERATION?

- Improve the customer experience of your web applications
- UK support included 24x7x365
- Expert advice on demand
- Flexible options to match your needs

## IMPROVING YOUR WEBSITE AVAILABILITY, SECURITY AND PERFORMANCE

## FEATURES

- Mitigates distributed denial of service (DDoS) attacks, allowing legitimate traffic through and keeping you on line
- Delivers content faster than if it had originated directly from the web servers, improving user experience
- Reduces latency and increases application speed and performance
- Delivers static and dynamic reusable content if the web servers are down
- Delivered via a Gartner Magic Quadrant tier 2 network platform and requires no hardware or software installation
- Geographic distribution with multiple European wide delivery nodes – 99.99% service level
- 24x7x365 UK specialist support with proactive monitoring
- Configurable specific to the customer's web application (optional)

## HOW IT WORKS

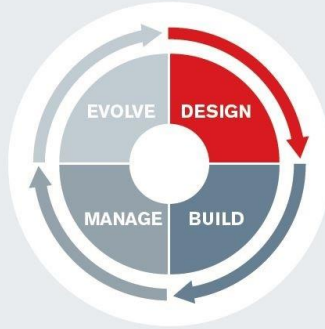

### How we work with you

#### 1 - Design

Our experts can advise you on our DDoS Protection and Web Acceleration options to ensure you get the right solution

#### 2 - Build

Working with Plan B removes the burden of project management and installation of your DDoS Protection and Web Acceleration service, saving you time

#### 3 - Manage

We take care of the ongoing management and monitoring of the DDoS Protection and Web Acceleration platform. However you retain the control you need with access to around the clock UK support

#### 4 - Evolve

We work with you to ensure your service continually meets your needs

## BENEFITS

### Availability

Increased resilience and improved web site up time

### Security

Protects your web application from current and upcoming security issues and attacks

### Performance

Improves web application page load speeds and user experience, while reducing server load
