

Managed DR Service with Azure

Plan B Managed Disaster Recovery Service with Azure

OVERVIEW

Plan B's Managed Disaster Recovery Service with Azure lowers the cost of enterprise class disaster recovery and gives you the freedom to choose the right level of protection for your business.

- ✓ Remove the cost of complex DR sites
- ✓ Choose where your data is located
- ✓ Scale without limitations
- ✓ Pay-as-you-use cloud pricing
- ✓ Reserve compute available on-demand
- ✓ Only run VMs when required for DR and testing
- ✓ 30-day history

With Plan B's Managed Disaster Recovery Service with Azure, your recovery systems are fully managed by our experts, giving you the peace of mind that your recovery will work seamlessly when you need it to. Plan B's service gives you the benefits of:

- Confidence that you are Azure ready following an in-depth consultancy process with our experts
- Acceptance test sign-off and certification to guarantee that your DR solution is working just how you'd like it to be
- Extensive 24x7x365 support from senior engineers with daily proactive management of your DR solution and dedicated account management
- Regular testing of your DR for ongoing peace of mind– choose from daily, weekly or monthly

- Immediate availability of your recovery solution without data loss.

HOW IT WORKS

Plan B's Managed Disaster Recovery Service with Azure utilises Zerto continuous replication to ensure that you won't lose data should your IT systems fail. Coupled with Plan B's fully managed service, your recovery to Azure is safely in the hands of the experts, and comes with full certification for added compliance and peace of mind.

A simple phone call is all it takes and Plan B will do the rest.

ZERTO CONTINUOUS REPLICATION

Hypervisor level replication ensures there is no performance impact to your live systems; and virtual protection grouping enables entire application sets to be recovered more easily. Failover and failback are automated, giving you greater business resilience. Point in time recovery enables you to choose your recovery point from just a few seconds ago, to within the past 30 days.

PLAN B MANAGED SERVICE

Plan B's specialist consultants will ensure that you are Azure ready and advise you on the best DR options to meet your needs. The service includes:

- Expert Zerto configuration set up and ongoing configuration management
- Virtual Zerto workloads configured to work on the Azure cloud, including network requirements and secure access provisioning
- Automated testing on either a daily, weekly or monthly basis to verify working status of machine, operating system and domain, status of processes, services and applications
- Detailed error diagnosis and fix-up guidance
- Proactive monitoring and fault management by senior engineers
- Pay-as-you-use compute resource
- 24x7x365 support by level 3 engineers and dedicated account management

Should you require a full system recovery, or even retrieval just of a single file, your Plan B team will be immediately ready for action with a simple phone call to our invocation hotline.

REAP THE BENEFITS

The flexibility of the Plan B's Managed Disaster Recovery Service with Azure enables your DR to adapt in line with your business.

- ✓ Ultimate recovery performance – immediate recovery of your IT systems with zero data loss.
- ✓ Pay-as-you-use testing and compute resource with competitive pricing to stay in control of your budget.
- ✓ Peace of mind that your DR service is in the hands of the experts, and will work trouble-free when you need it.
