

## Plan B Backup

Improve your business resilience with Plan B's backup solution powered by Veeam. Backup your VMware or Microsoft Hyper-V virtual environments offsite to Plan B's cloud, knowing you have the assurance of our Disaster Recovery expertise when you need it, and a secure environment for your data, built to ISO27001 standards.

### What are the benefits?

An affordable backup option, suitable to all businesses, Plan B's online backup service offers the benefits of:

- ✓ Instant, direct access to your backup data, within seconds, in the event of an IT failure.
- ✓ RPO's of as little as 15 minutes, reducing your data loss.
- ✓ Pay as you go charging structure.
- ✓ A secure offsite environment for your business-critical data, ISO27001 certified.

- ✓ Control of your data and recovery process via a simple web user interface.
- ✓ Disaster Recovery expertise on demand from Plan B engineers should you require extra support.
- ✓ Reduced business risk from an independent provider.

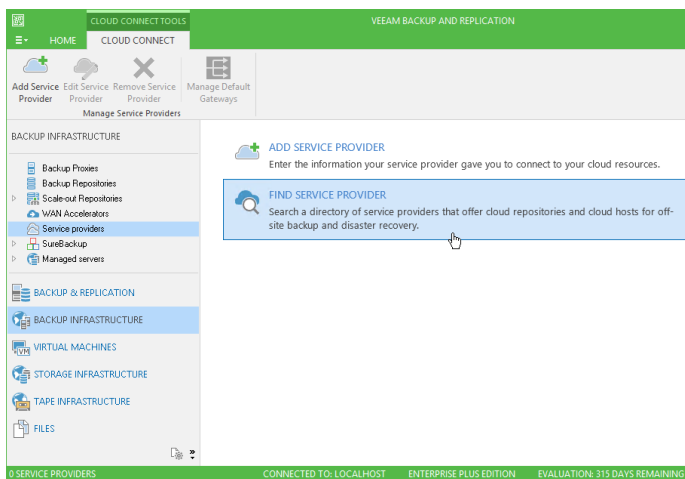

Everyone needs a place to store their backups offsite. If you don't have a second site, and find rotating tapes or removable media cumbersome, explore moving your backup to Plan B's cloud.

### How it works

Setting up Veeam Cloud Connect is done in just a few clicks:

1. Visit the Veeam backup console
2. Click 'add service provider' and enter the Plan B credentials given to you
3. Your cloud repositories appear in your backup infrastructure.

That's it! There's no VPN, no separate console, and cloud repositories work like other backup repositories – except they're available even if your primary data centre is lost.

## Features

- Backup entire VMs, individual files and application items.
- Create application-consistent backups with advanced application-aware processing.
- NEW Scale-out Backup Repository. Create a single virtual pool of backup storage to which backups can be assigned, offering easily extendable backup storage capacity.
- Advanced compression and de-duplication minimises stored data.
- Near continuous replication of data offsite offers virtually zero data loss.

- Automated recoverability testing of every backup.
- Built-in WAN acceleration gets backups off-site 50x faster than standard file copy.
- Secure backup and network transfers with end-to-end AES 256-bit encryption with no impact on built-in compression and WAN acceleration.
- Restore guest files and VMs with a single click through a web UI.
- Restore individual databases back to the original server, or a new SQL server, with a single click through a web UI.
- Data stored on high availability SAN infrastructure in one of Plan B's UK Recovery Centres.
- Plan B experts available on demand to support in any eventuality.
- ISO 27001 – Information Security Management accredited service for data security.

## Protect your company with Plan B

Plan B is a specialist Disaster Recovery provider that protects IT systems against downtime, delivering immediate recovery of servers and zero data loss.

Automated testing enables recovery systems to be tested to application level every 24 hours.
