

Backup and Recovery

Plan B Backup and Recovery Service

OVERVIEW

Improve your business resilience with Plan B's Backup and Recovery Service powered by Veeam. Backup your VMware or Microsoft Hyper-V virtual environments offsite to Plan B's cloud, knowing that you have the assurance of our disaster recovery expertise when you need it, and a secure environment for your data built to ISO27001 standards.

WHAT ARE THE BENEFITS?

An affordable backup option, suitable to all businesses, Plan B's Backup and Recovery Service offers the benefits of:

- ✓ Instant, direct access to your backup data, within seconds, in the event of an IT failure
- ✓ RPO's of as little as 15 minutes, minimising data loss
- ✓ Pay-as-you-use charging structure
- ✓ A secure offsite environment for your business-critical data, ISO27001 certified
- ✓ Control of your data and recovery process via a simple web user interface
- ✓ Disaster recovery expertise on demand from Plan B engineers should you require extra support
- ✓ Reduced business risk from an independent provider

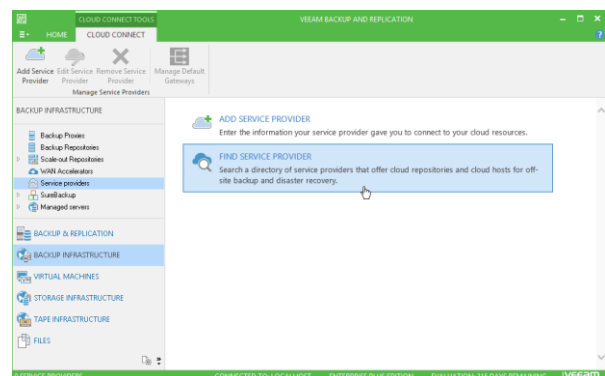

Everyone needs a place to store their backups offsite. If you don't have a second site, and find rotating tapes or removable media cumbersome, explore moving your backup to Plan B's cloud.

HOW IT WORKS

Setting up Veeam Cloud Connect is done in just a few clicks:

1. Visit the Veeam backup console
2. Click 'add service provider' and enter the Plan B credentials given to you
3. Your cloud repositories appear in your backup infrastructure

That's it! There's no VPN, no separate console, and cloud repositories work like other backup repositories – except they're available even if your primary data centre is lost.

FEATURES

- Backup entire VMs, individual files and application items

- Create application-consistent backups with advanced application-aware processing
- Advanced compression and de-duplication minimised stored data
- Near-continuous replication of data offsite offers virtually zero data loss
- Automated recoverability testing of every backup
- Built-in WAN acceleration gets backups off-site 50x faster than standard file copy
- Secure transfers with end-to-end AES 256-bit encryption with no impact on built-in compression and WAN acceleration
- Restore guest files and VMs with a single click through a web portal
- Restore individual databases back to the original server, or a new SQL server, with a single click through a web portal
- Data stored on high availability SAN infrastructure in one of Plan B's UK recovery centres
- Plan B experts available on demand to support any eventuality
- ISO27001 accredited for data security

PROTECT YOUR VIRTUAL SERVERS WITH ON-DEMAND DISASTER RECOVERY

With Plan B's Backup and Recovery Service, you are in control of your offsite data. Our web portal allows you to easily manage and recovery data freely from our secure data centres whenever you need it. Data is instantly accessible from a backup repository with RPOs of <15 minutes.

Should you need assistance or support during an incident, you can access our disaster recovery experts. We can help you to recover your IT systems,

offering support and guidance every step of the way, getting your business back to full service as quickly as possible.

RECOVERY OPTIONS

Plan B delivers fast, reliable restores of individual files, entire VMs and application items, ensuring you have confidence in virtually every recovery scenario.

- ✓ Recover to your own servers
- ✓ Recover to Plan B's platform
- ✓ Recover to an 'export server' at Plan B that can be made available online to replace a failed server
- ✓ Recover to an 'export server' at Plan B that can be shipped immediately to site to replace a failed server

Plan B's backup services come with recovery support on-demand, therefore giving you the confidence of additional help should you need it. We have expertise in recovering from total system failures to more common partial failures.
